Please imagine you are celebrating your 60<sup>th</sup> birthday together with your family and friends. The atmosphere is very friendly, suddenly your grand-daughter jumps on your lap and asks you the following question: "Grandfather / Grandmother, what have you done in your life?"

Please describe in 150 to 200 words what you WOULD LIKE to answer

My granddaughters life is a long journey and through it so many things happen. After completing my Primary School of Mtomondoni Primary I got a Scholarship through Education International to complete my education. Still in school I volunteered to work with a community based project which was dealing with HIV/AIDS - guiding and counselling and

awareness, we used to help people understand that being HIV positive was not the end of life. By doing so, we managed to restore hope to them and they were able to face life positively.

I graduated at a public university as a doctor and I was posted to work in a government hospital for five years and then resigned and joined the Kenya Red Cross as a volunteer doctor. Working with Red Cross I was able to help, rescue and assist many people from different parts of the world. As a social worker I decided to put up a children's rescue home to accommodate the rescued children. I helped children who were either abused by parents or relatives or abandoned by some.

What are your (professional) ambitions, and how will secondary education help you achieve your goals in life (100 to 150 words). My professional ambitions is to become a medical doctor, so as to help my community. My ambitions will only be realized if I will be able to join a secondary school which will be a gateway to either a good medical college or university. I wish to complete my studies so that I could be able to live a decent life, help my family which includes my four siblings and also give back to the community by helping the less fortunate. My dreams are becoming a helpful person not only to my family but also to the entire community. I believe that it is only through secondary school that my dreams could be realized or shattered.

Which are your favourite subjects and why? My favourite subjects are MATHS and SCIENCES because these subjects can make me achieve my ambitions of becoming a doctor.
